

Mount'n Mover Mounting Systems

*DO MORE - with a
mount that MOVES!*

Mount'n Mover™
by BlueSky Designs

mountnmover.com

2018

Anthony uses a Dual Arm for his speech device. He loves that he can move it:

- to pull up to a table
- to exercise at the gym
- to transfer

Unsurpassed innovation, flexibility, style, and independence!

Move beyond the limits of static mounts!

Move it!

Independently move it to:

- transfer
- pull up to tables
- for driving or watching TV

Multi-task!

Position and secure multiple devices (pg 7)

Do More!

Trays optimize access for functional independence. Eat, work, read, and more! (pg 12 + 13)

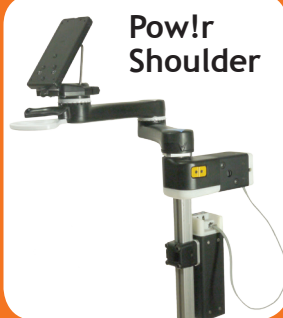

Swap it!

Swiftly and easily change devices: iPad, speech device, laptop, phone, camera and more! (pg 12,13,14)

Experience Powerful, New Independence!

Move your mount with the touch of a switch with a Mount'n Mover Pow!r Hybrid System (pg 8 + 9)

Pow!r Shoulder

Pow!r Tilt

" I love how my Mount'n Mover allows me to access my laptop in the wide variety of environments in which I work. It is sturdy and adapts easily when my needs change. Having the Mount'n Mover has increased my independence and been a lifesaver for me! "

Dawn

Get Started!

1. Choose your mount:

Mount'n Movers - Pages 4-5

- Independently move
- Custom memory locks
- Locking tilt

Easy Movers - Page 6

NEW!

- Customizable resistance to hold position
- Quick Connect Receiver or Tilt Plate
- Movable joints and tilt
- Non-locking

Simple Mounts - Page 7

3 Options: Quick Connect, Small or Large Tray

NEW!

- Change tilt (high or low resistance)
- Swivel
- Fold flat
- Store to the side

Pow!r Mounts - Pages 8-9

NEW!

- Power joint - Shoulder or Tilt
- Switch accessible
- Programmable memory positions

2. Choose what you want to attach:

Tray, speech device, camera, phone - pages 12-14

3. Choose where you want to mount it:

Wheelchair, table, floor stand - pages 15-18

See our website for wheelchair mounting and more!

Mount'n Mover

Tilt'n Turner / Single Arm / Dual Arm

The Next Generation has arrived!

It has a new look and added functionality!

- More precise fine tuning for eye gaze
- Twice the lock positions
- Increased forward tilt of the tilt plate (now 0° to 110°)
- New Link Cube
- Now in black!

* Silver model below is no longer available

Memory Lock Positions

Adjustable memory lock settings allow customized, consistent, and repeatable positioning of devices. Each joint offers up to 24 possible lock positions

Tilt'n Turner

- 1 rotational joint
- 24 Lock tabs/possible lock positions
- Tilt adjustable/locking tilt
- Very compact
- Position in front of armrest

MO-TQ-H (high resistance hinge)

MO-TQ-L (low resistance hinge)

Tip: Add a second device to a Dual or Single Arm Mount'n Mover — create a Double Decker!

Single Arm

Full extension 7.5 to 10.5 inches from the Shoulder to the Wrist Joint

- 2 rotational joints
- 24 lock tabs per joint
- 576 possible lock positions
- Simple to move
- More compact than Dual Arm
- Locking tilt

M1-TQ-H

(high resistance hinge)

M1-TQ-L

(low resistance hinge)

Shown:
Optional Link Cube
Configuration

Tip:

We recommend the High Resistance Hinge for heavier devices (5 lbs. or greater)

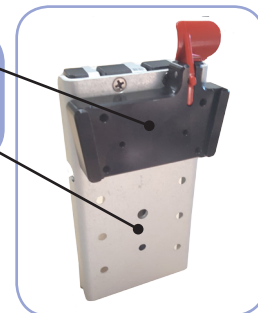

Quick Release Plate allows for quick and easy attachment and removal for a wide variety of devices

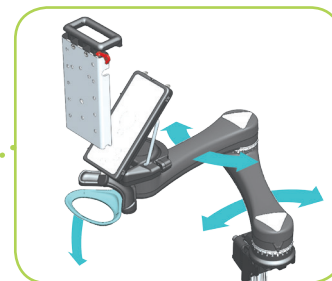

Increased forward tilt- ideal for eye gaze (0° to 110°)

The Quick Connect Receiver (QCR) (page 11) can be attached to the Quick Release Plate (QCP)

Paddle unlocks the wrist joint so you can easily rotate a tray or device

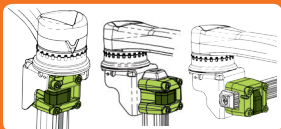

Unlock and Move Easily
Hoop unlocks both the elbow and shoulder joints simultaneously to make moving between operating positions easy

Dual Arm

Full extension 15 to 18 inches from the Shoulder to the Wrist Joint

- 3 rotational joints
- 24 Lock tabs per joint
- 13,824 possible lock positions
- Most versatile
- Requires little reach

Link Cube options:

M2-TQ-H
(high resistance hinge)
M2-TQ-L
(low resistance hinge)

Tilt angle adjustment:
easy lateral movement
unlocks the tilt

Easy Mover

Dual Arm / Single Arm

NEW!

Quick Connect Release

Increased forward tilt - 0-140° - ideal for eye gaze (up to 0-180° depending on device)

Hinge - available with either high or low resistance

Black finish

New Quick Connect Receiver

Sleeker without paddle or hoop

Customizable resistance at joints

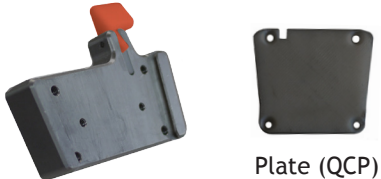

- Movable mount for speech devices, trays, cameras, and more!
- New Quick Connect Receiver is compatible with other mounts and devices
- Hinge on Easy Mover is available with either low or high resistance
- Joints can be adjusted from low to high resistance, low resistance requires less effort to move, high resistance requires more strength to move
- Joints can be fully tightened to lock
- Tilt does not lock
- Sleek design
- Lower price
- Weight limit 10 pounds

Single Arm

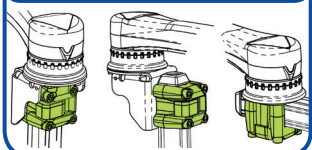

EM1-QC-H
EM1-QC-L

With New Quick Connect!

Receiver (QCR) Plate (QCP) (sold separately)

Link Cube with three attachment options

Dual Arm
EM2-QC-H (high resistance hinge)
EM2-QC-L (low resistance hinge)

Also available with non-locking Tilt Plate

EM1-TP-H EM1-TP-L Compatible with Quick Release Plate

Simple Mounts

Quick Connect / Small Tray / Large Tray

What makes them so great?

- Simple yet sturdy - holds up to 15 pounds
- Ideal for phones, remotes, iPads, tablets, speech devices, cameras, eating, writing, and reading!
- Create a double-decker with a Dual or Single Arm system
- Securely attaches to wheelchairs or table with Mount'n Mover hardware (sold separately)

Quick Connect

New Quick Connect Receiver is compatible with other mounts and devices (see web for order number)

Simple Mount Small

3.5" x 7" x .25"
Tilts / Swivels
(see web for order number)

Simple Mount Large

9" x 11.5" x .375"
Tilts / Swivels
(see web for order number)

Trays include Lip Supports:

- Adhesive - backed
- Place them anywhere
- Small tray includes 1
- Large tray includes 2
- Additional sets of 6 (sold separately)

Combine with a Dual or Single Arm to make a double decker! Or use two mounts! (see photo above)

The Simple Mounts include a post attached to a variable angle hinge. The hinge is available in either a high or low resistance. Choose your post length: 8", 12", 18", 24", or 36"

Clear tray swivels 360°, lays horizontal, tilts 0 - 90° and folds down flat to the side!

Attaches to wheelchairs using Mount'n Mover Wheelchair Hardware (sold separately)

For tables, use a Table Clamp

Pow!r Mount Hybrid Systems

Introducing the first power Mount'n Mover for independent device positioning

Mount'n Mover with Pow!r Shoulder

Hybrid configuration: Mount'n Mover and Pow!r Joint

Pow!r Shoulder Benefits:

Move to the side:

- For transfers
- To pull up to a table or sink
- To see to drive
- To increase independence
- Use from wheelchair, table, or bed
- For safety and well-being

Features:

- Single or Dual switch directional control
- Customizable target positions
- Rechargeable battery included
- Attach: Trays, speech devices, camera, laptop, or suction tube
- Built-in keypad for attendant
- Supports and moves up to 15 pounds

PM-HBD-S-H (high resistance hinge)

PM-HBD-S-L (low resistance hinge)

Mount'n Mover with Pow!r Tilt

Hybrid configuration: Mount'n Mover and Pow!r Joint

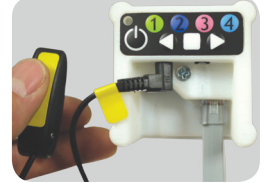

PM-HBD-T

Pow!r Tilt Benefits:

Move it to:

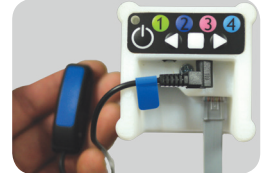

- Use your device
- See where you are driving
- Avoid glare
- Visual access in a reclined position

Single Switch A:
Toggle directions

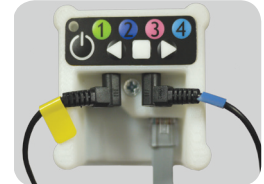

- Activate switch (or use arrow keys)
- Joint moves while held
- Let up, it stops
- Next activation, other direction

Single Switch B:
Two Target positions

- Activate switch and release
- Moves to a target position
- Activate and release
- Joint goes to second target position
- Click switch while moving it stops

Two Switches:
Direction-specific

- Activate and hold Switch A
- Stops when released
- Activate Switch B to go other way

Communicate all the time, everywhere!

Tana's communication device used to stay in her backpack at school and only come out when she was in a classroom where it could be placed securely on a table. Now, it is always accessible for conversation and can be safely, easily and independently repositioned as needed - even in a standing position.

Swap devices quickly Attach any device with ease

Device plates have been developed to attach communication devices to the Mount'n Mover's Mounts. Common devices are listed in the chart below. More options, including custom plates, are available.

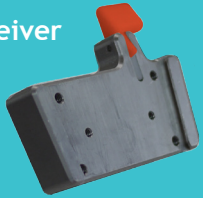

Find the attachment plate for your device

- Comes with elastic cord

TR-iTAB without Universal Rotator
 TR-iTAB-UR with Universal Rotator
 -Q add a Quick Release Plate

12"x12" Tray

- Add Velcro or Lip Supports to secure a phone or tablet
- Create an easel with a clip on the edge
- Attach a plate to it for eating, or use to hold remotes

TR-12x12-Q
 with Quick Release Plate

TR-12x12
 no Quick Release Plate

Additional options

Portrait

Landscape

Phone

- Attachment plate for mobile phone
- Includes an Otterbox Defender swivel case
- Can be rotated from portrait to landscape
- Shown with Quick Release Plate (not included)
- ✳ Must supply phone make and model at the time of order

DP-PHONE-OB

Camera Plate

- Attaches to Quick Release Plate (p.7) or add a Quick Connect Plate to attach to an Easy Mover
- Attaches directly to most cameras - with 1/4" and 3/8" screws (supplied)
- Attaches to tripod heads (not included)

After becoming frustrated trying to use a tripod and monopod, Suz was relieved to find out about the Mount'n Mover. She likes the flexibility it offers and that it allows the eye piece of the camera to be close to her eye. Attached to her power chair and tripod head, the camera goes with her everywhere and is always available to capture the perfect shot.

DP-CAM3

Universal Access Station Kit

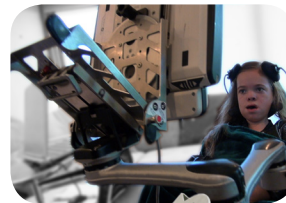

NEW!

- Ideal for schools, clinics, evaluation centers or work.
- Includes: Easy Mover, Dual Arm, Post, Table Clamp, and iTab Tray

UAS-KIT

Table & bed solutions

(toll free) or 1-612-724-7002.

For help choosing hardware go to:

mountnmover.com/support/wheelchair-mounting-overview

Select your wheelchair brand and model from drop down menu to view recommendations and mounting instructions

Solid Wheelchair Bracket

- Most rigid way to attach
- Simple and compact
- Has two mounting orientations

WB2

Angle Adjustment Plate

- Allows for rigid mounting for multiple angles, in increments of 7.5°
- Compatible with WB2 and all bracket mounting hardware.

Pair this with WB2 to more solidly adjust your post angle to vertical

WC-AAP

Adapter Plate

- Plate size: 3" x 1.75" x .25"

WC-AP

Adapter Plate 2

- Plate size: 4.75" x 2.25" x .25"
- Longer extension than WC-AP4

WC-AP2

Adapter Plate 4

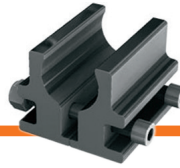

- Plate size: 3.75" x 2.25" x .25"
- More compact than WC-AP2
- Allows for 5/16" or 8mm bolts

WC-AP4

Adapter Plate 5

- Plate size: 5.5" x 2.0" x .25"
- longest/narrowest
- Allows for 5/16" or 8mm bolts

WC-AP5

Round Clamp

- Clamps to round tubing when bolting is not an option
- Select from 1" or 7/8" size

WC-R1 1"

WC-R7/8 7/8"

Round Bridge Clamp

- Must be used in a pair with an AP2 or AP4
- Choose 1", 7/8" or mixed pairs
- Eliminates tube-slip if clamped at right-angles

WC-R1B-set 1"

WC-R7/8B-set 7/8"

Collar Clamps

- Additional round tubing option (see website for sizes)

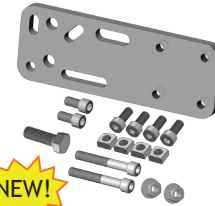

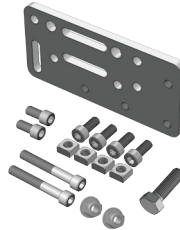

WC-Collar

T-Nut

- Compatible with TDX and Quantum style slide tracks

WC-TN

NEW!

L-Angled Extension Plate

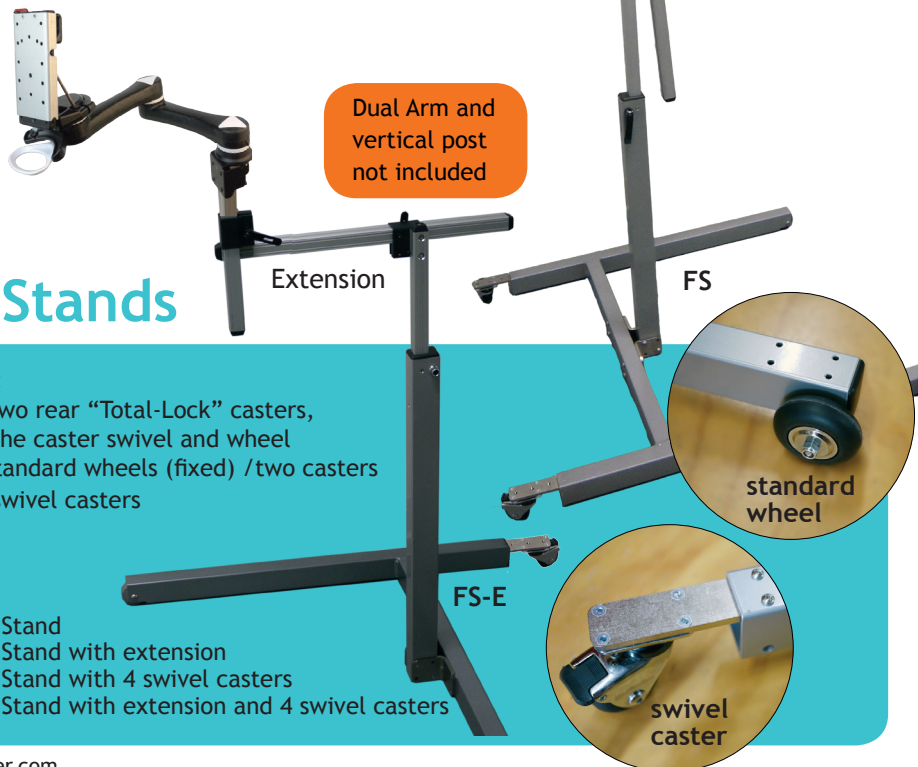

- Can be used singly to offset mounting at 90°, or used in pairs to extend mounting from 2.25" to 4.5"
- Fully compatible with all wheelchair mounting hardware

WC-LAE

Access anything, anywhere!

Move your Mount'n Mover from your wheelchair to the Floor Stand in seconds!

Easy access from bed!

Dual Arm and vertical post not included

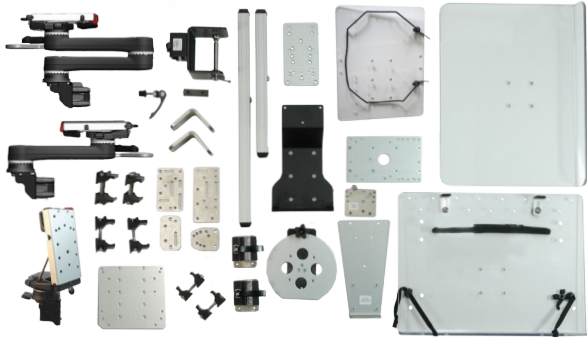

Floor Stands

Ester, an attorney who has cerebral palsy knows it's no big secret that she had been opposed to using communication devices much of her life. That is, until now. She hadn't found a communication device that matched her comprehensive vocabulary and, with her slow typing speed, the process took way too long. When she was introduced to eye gaze she had a change of heart. She embraced the technology but was discouraged when she thought she was limited to using it only at her desk at home with a table mount.

Esther said, "The mounting technology I saw had not advanced at all since the 80's. Due to my spasticity and lack of fine motor skills, I could never use these types of mounts myself. I had to rely on others to move it, and take it on and off, being 'confined to a wheelchair' had a whole new meaning."

Then her OT told her about the Mount'n Mover and she was immediately intrigued. During a trial of the mount she fell deeper in love with it. For the first time, she could move her device to transfer, access items on the table, and independently put her device on and off herself. Something she never fathomed being able to do. Finally she could take her communication device everywhere she went. ***"It's amazing how much impact a device can have on one's independence and empowerment!" states Esther.***

The Mount'n Mover is MIRACULOUS! Sarah loves it and her teachers at school say she is getting so much more work done now that she is comfortable and in a proper position.

Diane, Parent
