

Mount'n Mover Mounting Systems

*DO MORE - with a
mount that MOVES!*

Mount'n Mover™
by BlueSky Designs

mountnmover.com

2018 - 2019

Anthony uses a
Dual Arm for his
speech device. He loves
that he can move it:
- to pull up to a table
- to exercise at the gym
- to transfer

Unsurpassed innovation, flexibility, style, and independence!

Move beyond the limits of static mounts!

Move it!

Independently move it to:

- transfer
- pull up to tables
- for driving or watching TV

Multi-task!

Position and secure multiple devices (pg 7)

Do More!

Trays optimize access for functional independence. Eat, work, read, and more! (pg 12 + 13)

Swap it!

Swiftly and easily change devices: iPad, speech device, laptop, phone, camera and more! (pg 12,13,14)

Experience Powerful, New Independence!

Move your mount with the touch of a switch with a Mount'n Mover Pow!r Hybrid System (pg 8 + 9)

"Brylee LOVES her new mount! It's amazingly user friendly. The precise positioning capabilities are fantastic and the fact that her ideal position can be 'locked in', and easily returned to, is super helpful. Her speech device has given her a voice and the Mount'n Mover has made it easy for her to use it everywhere she goes! "

Michelle, Brylee's Mom

Get Started!

1. Choose your mount:

Mount'n Movers - Pages 4-5

- Independently move
- Custom memory locks
- Locking tilt

Easy Movers - Page 6

NEW!

- Customizable resistance to hold position
- Quick Connect Receiver or Tilt Plate
- Movable joints and tilt
- Non-locking

Simple Mounts - Page 7

NEW!

3 Options: Quick Connect, Small or Large Tray

- Change tilt (high or low resistance)
- Swivel
- Fold flat
- Store to the side

Pow!r Mounts - Pages 8-9

NEW!

- Power joint - Shoulder or Tilt
- Switch accessible
- Programmable memory positions

2. Choose what you want to attach:

Tray, speech device, camera, phone - pages 12-14

3. Choose where you want to mount it:

Wheelchair, table, floor stand - pages 15-18

Tilt'n Turner

Single Arm

Dual Arm

Easy Mover Dual Arm

Easy Mover Single Arm

Dual and Single Arms are also available with a locking or non-locking Tilt Plate

Simple Mounts

See our website for wheelchair mounting and more!

Mount'n Mover

Tilt'n Turner / Single Arm / Dual Arm

The Next Generation has arrived!

It has a new look and added functionality!

- More precise fine tuning for eye gaze
- Twice the lock positions
- Increased forward tilt of the tilt plate (now 0° to 110°)
- New Link Cube
- Now in black!

* Silver model below is no longer available

Memory Lock Positions

Adjustable memory lock settings allow customized, consistent, and repeatable positioning of devices. Each joint offers up to 24 possible lock positions

Tilt'n Turner

- 1 rotational joint
- 24 Lock tabs/possible lock positions
- Tilt adjustable/locking tilt
- Very compact
- Position in front of armrest

MO-TQ-H (high resistance hinge)

MO-TQ-L (low resistance hinge)

Tip: Add a second device to a Dual or Single Arm Mount'n Mover — create a Double Decker!

Single Arm

Full extension 7.5 to 10.5 inches from the Shoulder to the Wrist Joint

- 2 rotational joints
- 24 lock tabs per joint
- 576 possible lock positions
- Simple to move
- More compact than Dual Arm
- Locking tilt

M1-TQ-H

(high resistance hinge)

M1-TQ-L

(low resistance hinge)

Shown:
Optional Link Cube
Configuration

Tip:

We recommend the High Resistance Hinge for heavier devices (5 lbs. or greater)

Quick Release Plate allows for quick and easy attachment and removal for a wide variety of devices

Increased forward tilt- ideal for eye gaze (0° to 110°)

The Quick Connect Receiver (QCR) (page 11) can be attached to the Quick Release Plate (QCP)

Paddle unlocks the wrist joint so you can easily rotate a tray or device

Unlock and Move Easily
Hoop unlocks both the elbow and shoulder joints simultaneously to make moving between operating positions easy

Tilt angle adjustment:
easy lateral movement unlocks the tilt

Dual Arm

Full extension 15 to 18 inches from the Shoulder to the Wrist Joint

- 3 rotational joints
- 24 Lock tabs per joint
- 13,824 possible lock positions
- Most versatile
- Requires little reach

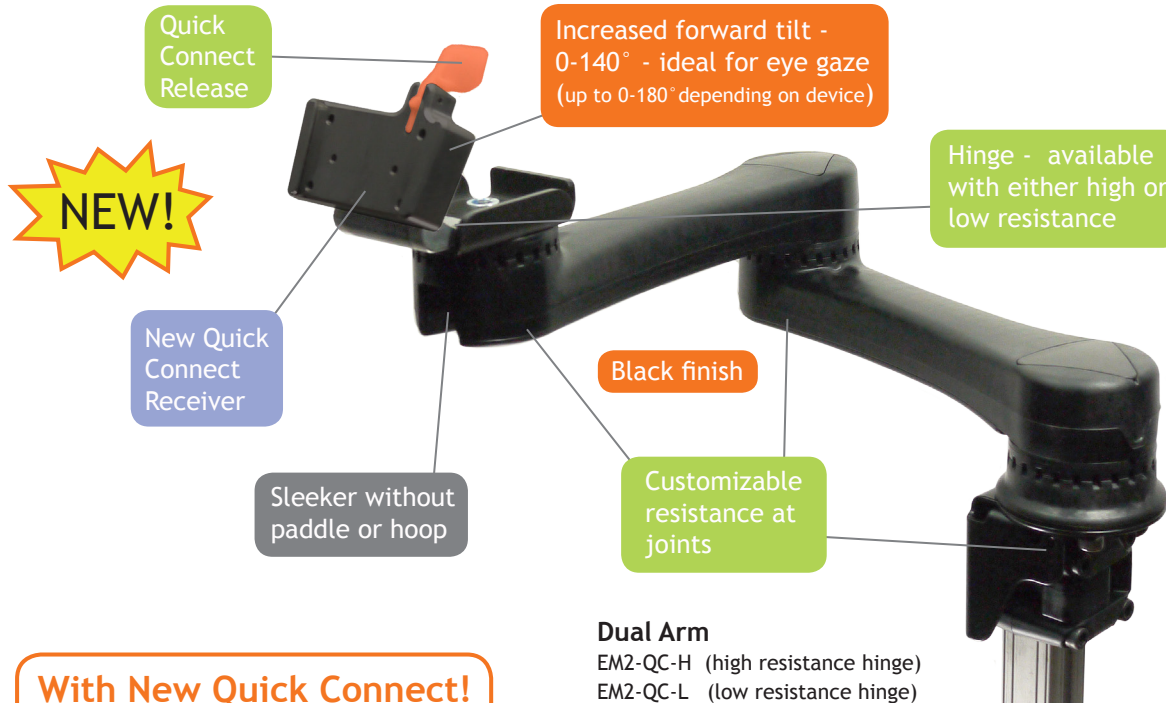

Link Cube options:

M2-TQ-H
(high resistance hinge)
M2-TQ-L
(low resistance hinge)

Easy Mover Dual Arm / Single Arm / Tilt'n Turner

With New Quick Connect!

Receiver (QCR)

Plate (QCP)
(sold separately)

- New Quick Connect Receiver is compatible with other mounts and devices
- Hinge on Easy Mover is available with either low or high resistance
- Joints can be adjusted from low to high resistance, low resistance requires less effort to move, high resistance requires more strength to move
- Tilt does not lock
- Weight limit 10 pounds

Single Arm

EM1-QC-H
EM1-QC-L

EMT-H
EMT-L

Also available with locking or non-locking Tilt Plate

Compatible with Quick Release Plate

EM1-TP-H or (L)

EM2-TP-H or (L)

EM1-LTP-L or (H)

EM2-LTP-L or (H)

Locking Tilt Plate

Locking Tilt Plate

Simple Mounts

NEW!

Quick Connect / Small Tray / Large Tray

What makes them so great?

- Simple yet sturdy - holds up to 15 pounds
- Ideal for phones, remotes, iPads, tablets, speech devices, mouse, switches, eating, writing, and reading!
- Create a double-decker with a Dual or Single Arm system
- Securely attaches to wheelchairs or table with Mount'n Mover hardware (sold separately)

Quick Connect

New Quick Connect Receiver is compatible with other mounts and devices

(see web for order number)

Simple Mount Small

3.5" x 7" x .25"

Tilts / Swivels
(see web for order number)

Simple Mount Large

9" x 11.5" x .375"

Tilts / Swivels
(see web for order number)

Trays include Lip Supports:

- Adhesive - backed
- Place them anywhere
- Small tray includes 1
- Large tray includes 2
- Additional sets of 6 (sold separately)

Combine with a Dual or Single Arm to make a double decker!
Or use two mounts!
(see photo above)

The Simple Mounts include a post attached to a variable angle hinge. The hinge is available in either a high or low resistance. Choose your post length: 8", 12", 18", 24", or 36"

Clear tray swivels 360°, lays horizontal, tilts 0 - 90° and folds down flat to the side!

Attaches to wheelchairs using Mount'n Mover Wheelchair Hardware (sold separately)

For tables, use a Table Clamp

Pow!r Mount Hybrid Systems

Introducing the first power Mount'n Mover for independent device positioning

Mount'n Mover with Pow!r Shoulder

Hybrid configuration: Mount'n Mover and Pow!r Joint

Pow!r Shoulder Benefits:

Move to the side:

- For transfers
- To pull up to a table or sink
- To see to drive
- To increase independence
- Use from wheelchair, table, or bed
- For safety and well-being

Features:

- Flexible positioning of a Mount'n Mover
- Single or Dual switch directional control
- Customizable target positions
- Rechargeable battery included
- Attach: Trays, speech devices, camera, laptop, or suction tube
- Built-in keypad for attendant
- Supports and moves up to 15 pounds

PM-HBD-S-H (high resistance hinge)

PM-HBD-S-L (low resistance hinge)

Mount'n Mover with Pow!r Tilt

Hybrid configuration: Mount'n Mover and Pow!r Joint

Pow!r Tilt Benefits:

Move it to:

- Use your device
- See where you are driving
- Avoid glare
- Visual access in a reclined position

Single Switch A:
Toggle directions

- Activate switch (or use arrow Keys)
- Joint moves while held
- Let up, it stops
- Next activation, other direction

Single Switch B:
Two Target positions

- Activate switch and release
- Moves to a target position
- Activate and release
- Joint goes to second target position
- Click switch while moving it stops

Two Switches:
Direction-specific

- Activate and hold Switch
- Moves one direction
- Stops when released
- Activate Switch B to go other way

Communicate all the time, everywhere!

Tana's communication device used to stay in her backpack at school and only come out when she was in a classroom where it could be placed securely on a table. Now, it is always accessible for conversation and can be safely, easily and independently repositioned as needed - even in a standing position.

Swap devices quickly Attach any device with ease

Device plates have been developed to attach communication devices to the Mount'n Mover's Mounts. Common devices are listed in the chart below. More options, including custom plates, are available.

- Attaches to Quick Release Plate (p.7) or add a Quick Connect Plate to attach to an Easy Mover
- Attaches directly to most cameras - with 1/4" and 3/8" screws (supplied)
- Attaches to tripod heads (not included)

After becoming frustrated trying to use a tripod and monopod, Suz was relieved to find out about the Mount'n Mover. She likes the flexibility it offers and that it allows the eye piece of the camera to be close to her eye. Attached to her power chair and tripod head, the camera goes with her everywhere and is always available to capture the perfect shot.

DP-CAM3

Universal Access Station Kit

NEW!

Esther, an attorney who has cerebral palsy knows it's no big secret that she had been opposed to using communication devices much of her life. That is, until now. She hadn't found a communication device that matched her comprehensive vocabulary and, with her slow typing speed, the process took way too long. When she was introduced to eye gaze she had a change of heart. She embraced the technology but was discouraged when she thought she was limited to using it only at her desk at home with a table mount.

Esther said, "The mounting technology I saw had not advanced at all since the 80's. Due to my spasticity and lack of fine motor skills, I could never use these types of mounts myself. I had to rely on others to move it, and take it on and off, being 'confined to a wheelchair' had a whole new meaning."

Then her OT told her about the Mount'n Mover and she was immediately intrigued. During a trial of the mount she fell deeper in love with it. For the first time, she could move her device to transfer, access items on the table, and independently put her device on and off herself. Something she never fathomed being able to do. Finally she could take her communication device everywhere she went. ***"It's amazing how much impact a device can have on one's independence and empowerment!" states Esther.***

"The Mount'n Mover is MIRACULOUS! Sarah loves it and her teachers at school say she is getting so much more work done now that she is comfortable and in a proper position."

Diane, Parent
