Who's coming? OTs, PTs, SLPs, Educators,
Parents, VR counselors, AT specialists, Transition
specialists, Case managers, People with disabilities

Abstract: Positioning and securing devices and trays for access can be a challenge for people with major and even minor mobility limitations. Mounting systems help stabilize and position devices for optimal access on wheelchairs, tables, beds and floor stands through every stage of a condition or disease over a lifetime. Mary Kay Walch brings more than 30 years of experience to this half-day session.

Topics include:

- Considerations in determining the best solutions and positioning a range of devices.
- Critical assessment questions and a step-by-step process will be provided to identify mounting needs and introduce a holistic model.
- Case studies, hands-on demonstrations, wheelchair attachment resources, strategies and solutions for accessing eye gaze systems will be presented.
- Medical rational and justifications will be discussed.

Signed Certificate of Attendance and Learning Objectives will be provided.
