

Mount'n Mover

by BlueSky Designs

Mounting: Rethinking Traditional Static Options

Objectives:

- List 5 benefits and medical justifications for a movable mounting and positioning system
- Identify 3 ways using a movable mounting system impacts functional and psych-social well being
- List 3 types of device mounting/positioning alternatives and a feature consideration for each

As the use of mobile technology grows...so does the need for mounting!

- Assistive technology keeps evolving
- Mainstream technology e.g. Microsoft Windows 10 includes built-in eye tracking support good for eye gaze communicators
- More affordable to obtain
- Download apps
- Communication options expanded, not just traditional modalities but also texting, instant messaging, e-mail, and social media
- Multiple devices: phone, laptop, tablet, iPad

Why do you need a mount?

Why mount? To support a person's physical and psychological well being to be able to readily and independently access food, drinks, technology and more!

Need to position and secure these items for optimal access through every stage of a condition. Adapt to physical changes and access method changes.

Independence!!!

Optimizing Device Positioning

“Optimal” varies (consider the whole picture)

- From person to person
- Their needs and specific considerations
- Impacts access, mobility, health, independence

Holistic approach

- Accommodate different devices and activities
- Multiple devices (concurrent access)
- Different operating positions
- Across environments (bed, w/c, table, work)

Types of Mounts

Simple: Basic support, static

Added Features: Movable, locking

High Tech: Powered

Static vs. Movable

Static Mount

- Impede transfers
- Obstructs vision
- Single operating position
- Most can not be moved independently

Movable Mount Consider if you want...

- Move independently
- Set multiple lock positions, changes with ability
- Safety - visual or physical access, reduce tipping hazard
- Use multiple devices

Do more – with a mount that moves!!!!

Movable Mount

Michael is able to move his mount to the side to pull up to a desk or access his tray.

"The Mount'n Mover has greatly increased my independence level each and every day. The mount lets my iPad sit at eye level and is readily available for when I want to check or read something, or when I need it as a communication device. While at work, I can move the arm with the nifty handle so I can roll into my work station. In addition, the Mount'n Mover provides the opportunity for me to take pictures and videos on my own. Needless to say, this device is a great tool to greater one's freedom and I give it my approval!"

Michael L. Sack

Movable Mounts

Unique mechanisms allow users to independently manipulate the attached device with great ease and flexibility.

Simple Mounts

Quick Connect

Speech devices,
Compatible with
other mounts

Small Tray 3.75" x 7"

Phones, remotes, small devices

Large Tray 11.4" x 9"

Medium devices, eating,
writing and reading

New Simple Mount Quick Connect

Quick Connect Plate

All Swivel

Lay Horizontal

Large tray has off-set
option to adjust depth

Vertical Tilt

Folds Down flat for Storage (trays)

Customizable Support Edges for Trays

Bottom placement

Bottom and side placement

Corner placement

Attach 2 edges to make channel

Double Decker - Simple Mount with Dual or Single Arm

Mount'n Mover Options

Dual Arm

Single Arm

**Tilt'n
Turner**

Mount'n Tilter

Now black! Silver original.

Moving The Arm

1. **Press hoop.** Unlocks both shoulder and elbow.
2. **Move** both arms at once. Use hoop to steer.
3. **Let up** on the hoop. Continue moving arms to find a memory lock position.

Rotate The Wrist

1. Press **PADDLE** to unlock wrist. Wrist is momentarily unlocked at that position.
2. **Move it!** Wrist will remain unlocked until it finds memory lock position.

One-handed operation!

Adjust The Tilt

1. **Unlock:** move tilt lever to the right.
2. **Adjust tilt angle:** push down or pull up on the device.
3. **Lock:** move tilt lever to the left.

High or Low resistance hinge available.

High resistance hinge recommended for large devices 5 pounds or heavier.

Slight forward tilt for eye gaze access

Customize Lock Positions

To set one or more lock positions, push lock setter(s) down.
Up to unlock*.

**Setters can only flip up when NOT locked in position*

Quick Release Plate (QRP)

The QRP is needed to attach a device or tray to the Mount'n Mover.

The QRP makes attaching or swapping out devices a snap!

Easy Mover

- Movable joints
- Adjustable low to high resistance
- New Quick Connect Receiver compatible with other mounts and devices
- Available with locking and non-locking tilt plate

Dual Arm with
Quick Connect Receiver

Single Arm

Quick Connect Plate

Easy Mover Tilt'n Turner

Quick Connect Plate
Locking or Non-Locking

Table Mounts

Table Clamp

Mount'n Tilter

Stand +90

Where to Mount

Wheelchair

Standers

Strollers

Where to Mount

Wall

Floor Stand

Bed

Walkers

Table

Adapts to different environments

Moves easily from chair, bed, table, stander, walker and floor stand!

One Mount - Many Uses

Adapts to different environments. Wheelchair, bed, walker, stander, table and floor stand!

Access ALL Day = Increased Communication

School added mounts for AAC to:

- Gait Trainers
- Adapted classroom chairs
- High/low standers
- Beds and more!

Noticed constant access to devices led to increase in communication

***“No more sabotaged
“speech sessions” and
set up time significantly
decreased”***

~Julie OT

What to Mount

Communication Devices

Technology

Other

Trays

Camera

Rosie

“Overcoming obstacles is the stuff of being a disabled person, and so when the mountain seems ever harder to climb, we look at ways of moving the mountain a little closer which, for most of us, means we can look at ways of making life easier in all kinds of different ways”.

“One of the things the Mount’n Mover does is give you back some of the spontaneity that life as a disabled person doesn’t always allow. With the Mount’n Mover the emphasis is very much on the product meeting the needs of the consumer”.

Device & Tray Attachment Options

iTab Tray

12" x 12" Tray

Universal Rotator

Stand +90

Camera

Laptop Tray

Tray with Lip

Phone

Tablet & Keyboard

Device Plates

Custom Trays Available

Custom Large Tray

Can be independently moved by the User

Reduces dependency on caregivers

Increased independence in performing functional skills like eating, writing and communicating

Provides access to device in case of an emergency

FREEDOM!

Independence Communication

Greta places her order at the restaurant independently

Allows for a Variety of Adjustments

Accommodates for change in positioning, growth, fatigue, or environment.

Mount Tilts & Moves With the Chair

Brea tilts her chair to take a picture of the fish swimming above using her communication device with eye gaze!

Move For Visual Access

Rotates for
visual access
when driving!

Access
device
when
standing!

Access Beyond the Chair

Swing mount around to still access device from chair or bed.
Can eliminate need for additional bed or table mount!

Double Decker Multipurpose

Easily swap out
devices or trays!

Multi-tasking

Double Decker
Dual Arm and Tilt'n Turner

Offset Link Cube to allow lower placement on post for Double Decker

One tray holding 2 items

Two mounts

Dual Arm with locks holds Laptop

Simple Mount with Large Tray holds mouse or phone and offers an arm rest when fatigued.

***“I can now access my laptop everywhere – not just my office”
-Cindy***

Operating Positions Adjustability

Attached to power chair
Allows camera to get close to eye
Rotation and tilt

Unique Operating Position

Ergonomics

Varies per person's needs

Access to iPad

Mount is below seat level

Stabilizes arm on leg

Angled for access (Vis/Phys)

Access to computer table

Needs to move it to the side

Elevates herself to work on her computer

Unique Operating Position

iPad mounted at seat level provided ability to stabilize arm for direct select access

Therapeutic Benefits Improve Posture

Neck pain reduced
immensely after just
one week with
elevated.

BEL13VE in Miracles
Foundation
Jack Jablonwski

Therapeutic Benefits Improve Posture

Positioning iPad
at eye level
improved posture

Access Method Eye Gaze or Head Tracker

Eye Gaze Optimal Positioning

- Positioning is critical
- Easy calibration
- Need consistent placement of device
- As position changes throughout the day - so must the mount
- Tilt and rotation
- Easy for caregivers - multiple locked positions
- Moves from chair to bed, table, wall or floor stand

Universal Rotator

Rotates

- Communication device for head tilt and side-lying for eye gaze access
- iPads from landscape to portrait and back

Stand +90

Positioning is critical

Consistent placement of device is essential

Stand+90 and Universal Rotator

Sophia needed to use eye gaze for access to her communication device while in bed and in her chair

Solution: Floor Stand, Dual Arm, Stand +90 with Universal Rotator

Easy Mover - Eye Gaze

Greta uses eye gaze to communicate, learn, create art and make music!

Searches information on her iPad, then talks about them using her speech device

Greta the Artist

<http://studiogreta.co.uk/>

Eye Gaze

At home and school!

Move from Chair to Bed

Update - Easy Mover with Locking Tilt Plate

Sophia now uses an Easy Mover. The family finds it easier for the multiple caregivers to use.

Video: Sophia and Her Mount'n Mover

https://www.youtube.com/watch?v=AGJK80_8jvM&feature=youtu.be

Eye Gaze Access

At the dinner table

- Mount' n Tilter

At school tables

- Table clamp
- Mount' n Tilter

On the floor

- Standing
- In low position

Functional Needs Think Outside the Box!

Functional Needs Music Class

Trumpet is mounted to support weight and raise into position

Functional Needs Eating

With optimal positioning of his plate, Jordan can feed himself for the first time!

Universal Access Station Kit

- Cafeteria, library
- Therapy room
- Evaluations Centers

Evaluation Tool

- Mount can allow for ease adjustments and is customizable for evaluations
- Ability to be quickly attached to a variety of surfaces, easily moved, and provide a stable set up for evaluations
- Consider using it during therapy sessions for working on range of motion, posture and visual access or testing

Evaluation Kits

**Device Plate
Attachment Set**

**Eval Kit
includes Case**

Table Eval Kit

Grows with Client to Meet Changing Needs

Tools for life!

ALS - Mount Changes as Abilities Change

Gae - first mount user!

- Positioning reduces fatigue
- Transfer and use the toilet
- Reboots device, adjusts for glare
- Visual access for driving, TV
- Access to tables and sink
- Moves to exercise her legs
- Moves to side for photos

The pow!r mount

A powered mounting and positioning system

- Control options:
 - Switches
 - Touch display
 - Accessible app
 - Easy and efficient (target positions)
 - Independence (adjust individual joints)
 - Customizable (change devices, controls, preferences, different configurations)
 - Android and iOS

New Single Joint Pow!r

- Tilt device – prevent glare, drive
- Move to the side to transfer
- Move close for visual or physical access
- Increase independence

New Pow!r Mount Shoulder Hybrid System

Mount'n Mover with Pow!r Shoulder

Single or Dual switch control

Three modes of control:

- Alternate directions with one switch
- One switch for each direction
- Go to customizable target positions with one switch

Brea

Brea uses the Pow!r Mount to bring her eye gaze communication device into position.

Custom Pow!r

Shane has a custom Pow!r mount fitted to his chair. With it, he can raise and lower his joystick with the push of a button, allowing him to access his laptop or joystick whenever he pleases instead of having someone move it for him. Allowing him to access his laptop and phone.

For the first time in over 10 years he was able to move his joystick independently!

Shane moves his joystick!

New Pow!r Mount Tilt Hybrid System

Mount'n Mover with Pow!r Tilt

Single or Dual switch control

Three modes of control:

- Alternate directions with one switch
- One switch for each direction
- Go to customizable target positions with one switch

Matt uses a Pow!r Tilt to adjust his device angle using dual Head switches for taking photographs.

Direct, Single or Dual Switch Access

End Cap: access, switches, power, and control

Built-in keypad

No app required for Single joints/Hybrids

Switches plug into End Cap

Switch 1: Toggles direction

Switch 2: Goes to 2 Target positions

Two switches: Directional

Power options

Built-in 12v lead acid battery

Wheelchair battery

AC-DC converter/power supply

Case Study: Scott

Mayo clinicians and BlueSky Designs

Overview

- Tetraparesis due to SMA
- Lives alone in the community
- Enjoys playing games, watching movies and socializing with friends on the computer
- Need for power mount:
 - Create opportunity to self suction oral secretions while home alone

Scott's Computer Workstation

Challenges

Limited care time - set up at desk in power wheelchair

Decrease risk for aspiration pneumonia, choking and respiratory infections

Thumb and Index finger flexion, extension, minimal pronation/supination on right hand, slight pronation on left hand

Using voice increased saliva, gurgle sound

Solution: Independent Suctioning via a Hybrid Mount with Power Shoulder

Power shoulder joint

Brings yankauer into position with thumb and MicroLite switch

Actuates suction with index finger and 2nd switch

Attaches tube to plate with PVC angle and clips

Final Setup

Kensington Expert Trackball
MicroLite Switches (2)
PowerLink 2
Hybrid Mount with Power Shoulder
Yankauer

Scott: Case Study Outcomes

Quantitative

- Decrease in frequency of respiratory illness

Qualitative

- Patient-Specific Functional Scale
 - Score increased from 0 to 10 with self suctioning independence
- Decreased anxiety
 - “I would limit what I would do because I had a feeling of drowning”
- Increased engagement with friends
 - “I actually talk to people a lot on the computer and now I can talk the whole time...my voice doesn't get gurgly”

Future Developments

Pow!r Mount Multiple Joints

Control options:

- Switches
- Touch display
- Accessible app
 - Easy and efficient (target positions)
 - Independence (adjust individual joints)
 - Customizable (change devices, controls, preferences, different configurations)
 - Android and iOS
 - Touch with finger or stylus tip
 - Switches: Timed scan or Step scan

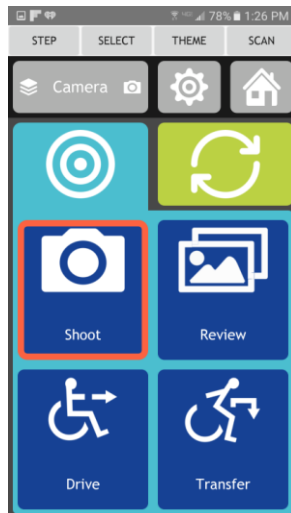

Pow!r Mount App's Main Screens

Targets—to quickly move to favorite positions

Adjust—to make adjustments to individual joints

Groups—Sets of targets for devices or environments

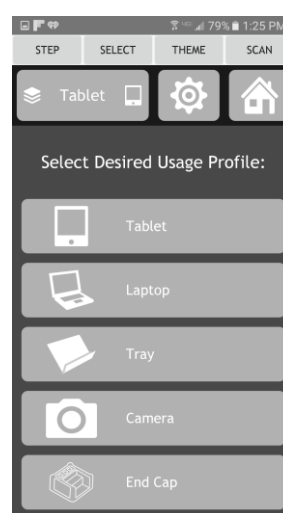

TARGETS

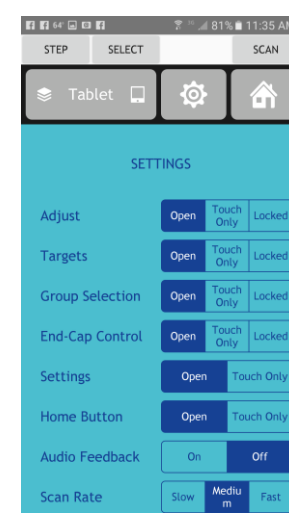

ADJUST

GROUPS

SETTINGS

Future Developments Auto Repositioning

A mount that Auto-Repositions a speech device!

Out of position
(not calibrated)

Pow!r Mount repositions
(calibrated)

Assessment Questions

- Does it allow for daily adjustments for change in positioning, growth, fatigue, environment?
- Can the mount be used independently by the user?
- Does the mount allow access to a variety of items?
- Can it provide multiple operating positions without the use of tools?

Assessment Questions Continued

- Does it enable independent access to a communication device in all situations and environments at all times?
- Can the device be moved out of the way rather than removed entirely risking damage and loss?
- Does the mount provide consistent positioning for specific locations?
- Can it be moved from chair to bed thus eliminating the need for 2 mounts?
- Does it help caregivers set up device?

Medical Justifications

Need to access from a tilted position

Improved visual access for driving

Positioning for access from more than one position (direct and eye gaze)

Able to quickly move the device

Hygiene: able to use a sink and toilet

Positioning changes, so device must change

Must adapt as abilities change (ALS, MD...)

Safety - keep chair from tipping

See: www.mountnmover.com/evaluate-buy/funding/

Letter of Necessity

- Provides independence through positioning and ease of use
- Allows for appropriate communication device position while the chair is tilted
- provides (name) continuous access to their communication device in the event of an emergency
- Decreases tipping hazard
- Improved visual access for driving/wheeling
- Customized lock positions avoids caregiver guessing and frustration
- Provides access to technology/communication 24/7 in case of emergency

Health Benefits

Optimal Positioning and Access Provides:

- Ability to exercise without restrictions
- Improved range of motion & fine motor dexterity
- Improved access to sink and toilet (hygiene)
- Improved ability to eat (up to a table or positioning of tray)
- Improved ergonomics; less pain
- Ability to change positioning based on the activity
- Better head control due to device positioning (height & tilt)
- Less fatigue

Movable mounts promote independence and access

Individuals using a movable mounting system experienced functional gains and psychosocial benefits resulting from increases in their independence and self-esteem (Kinney, Gitlow, Goodwin, 2014)

Psychosocial Benefits Of A Moveable Mount Reported

Study by Ithaca College OT Department

PIADS: How are you affected by the Mount' n Mover?

Adam Kinney, MS and Lynn Gitlow, PhD, OTR/L, ATP

"A Consumer-Centered Approach to Evaluating Assistive Technology Usability Outcomes"

June 2015 issue of American Occupational Therapy Association Special Interest Section on Technology.

Increase:

Competence

Adaptability

Self esteem

Decrease:

Frustration

Embarrassment

Confusion

Impacted more than device access, unrelated tasks were easier to perform. Tasks included: transferring, answering calls, socializing, feeding, shopping, and adaptive baseball.

- And more!

A Lets get started....first we need some information:

Contact Person

Organization _____
Name _____
Street _____
City/State/Zip _____
Phone # _____
Email _____

Wheelchair - Stroller - Walker - Bed

Make/Model _____
Power wheelchair Walker
Stroller Power standing wheelchair
Tilting wheelchair Bed

Device [See website for Device Plate Graph](#)

AAC Make/Model _____
Phone Make/Model _____
(We will need exact dimensions of phone)
Tablet Make/Model _____
(We will need exact dimensions for Tray)

Where to Mount

Mount to clients right/left side? _____
Additional mounting requirements
(2nd wheelchair, floorstand, table stand, bed?)

Client

Name _____
Street _____
City/State _____
Zip Code _____

Client Characteristics

How does client access their device?
(Direct select, switch, eyegaze/head tracker?)

If direct select: (gentle touch, strong touch, or medium touch) _____

Can client use both arms/hands? Preference? _____

What is clients range of motion?
(Do they have enough range of motion to reach across the midline?)

Would a locking or non-locking mount be preferred? _____

(FYI - the tension on the non-locking mount can be adjusted to require a light or heavy touch to move it)

Wheelchair mounting overview

The diagram below shows how to mount to your wheelchair or other object. Click on hardware parts in the diagram to view specifications and install instructions. Click here to view a high-resolution version of the diagram (JPG).

A) Choosing the right mounting hardware B) Selecting a wheelchair bracket

Offset options
Custom fabrication

Mount Location

Determine attachment location to suit end-use

Attaching to the seat rail minimizes post length and allows users to maintain access to devices at different tilt angles.

Seat-Rail: Use if mount needs to tilt with the seat.

Example:
A speech device tilts to allow communication from any angle

Select your wheelchair or other item below to see hardware recommendations and mounting instructions.

Brand/Model

- Select -

If you prefer that the mounted device does not tilt with a tilting wheelchair, attach to the sub-frame or base.

Frame-Rail: Use if mount must remain stable regardless of seat angle.

Example:
A tray for eating needn't tilt.

Mounting hardware by wheelchair type

Check out our mounting options list, where we have mounting guides for many wheelchairs, walkers and more.

We also have generic guides for various frame types, listed in the Mounting Guides menu.

Offsets and extensions

Mounting to a wheelchair can sometimes be tricky. There will be situations where
