This guide describes the basics of setting up your Mount’n Mover so that it stops at, moves from, and returns to any desired position. For further assistance, please call us at 888-724-7002, or 612-724-7002 or check out our website for more detailed instructions.

mountnmover.com

**Move It**
- move shoulder & elbow joints
- rotate wrist joint
- change tilt-plate angle

**Depress HOOP to unlock elbow & shoulder joints**
Move It from lock position
To find lock position release downward pressure on hoop and move until arm stops

**Depress PADDLE to release the wrist lock**
Move it
Wrist will remain unlocked until it reaches lock position

**Slide LEVER to the right to unlock the tilt-plate**
Position the tilt-plate to the desired orientation
Slide the LEVER to the left to lock the tilt-plate

**Set It**
To set custom lock positions:
Align black arrow with desired lock position and slide lock tab down

**Initial Setup**
Flip up all lock tabs so joints move freely with no lock positions

**You cannot unset a lock tab with the black arrow directly above it**
Orient to best fit user needs; move black arrow to nearest lock tab; slide lock tabs down to set locks

**Fine Tune Wrist**
1. Set lock
2. Loosen hex head bolt
3. Adjust device orientation 7°
4. Tighten hex head bolt

**Precisely adjust lock position**

**Mount Link Cube**
Open Link Lever (if difficult to open, loosen each bolt slightly).
Slide Link Cube on to post. Line up slot on post with front of cube.
Close Link Lever to secure cube to post. If cube moves on post, tighten bolts 1/4 turn.

**Attach It**
- detach Quick Release Plate (QRP)
- reattach QRP
- attach device to device plate

**Set It**
- Mount Link Cube (Slot on Post)
Open Link Lever (if difficult to open, loosen each bolt slightly).
Slide Link Cube on to post. Line up slot on post with front of cube.
Close Link Lever to secure cube to post. If cube moves on post, tighten bolts 1/4 turn.

**Mount it**
- Mount Link Cube

**Adjust it**
- Fine Tune Wrist

**Release “red lock” by rotating clockwise**

**Unlock by pulling out + up on handle (highlighted green)**

**Lift off by pulling forward and up**

Reverse these steps to re-attach to device plate

**Attach to quick release plate**
**Attach device to appropriate device plate**

**Optional:**
For a tighter and more permanent mount to the post, tighten 4 bolts to snug. Be sure Link Lever is closed.
Use our Round Clamp for mounting vertically to round tubing

Our Bridge Clamp provides a stable mounting solution for most chairs with round tubing

Collar Clamps come in a wide variety of sizes to fit most round tube wheelchair frames

Post Alignment
- post should be vertically oriented for the user’s typical upright position (dashed line in a)
- slots in clamp + post must align
- post clamp pressure should be set so that, when clamped, the post is held tightly and securely
- post height set screw ensures repeatable height & safety

Clamp Pressure
- 1/4-28 threads

post
link cube

Adjust it
- step-by-step instructions and mounting options are available at: www.mountnmover.com
- periodically check that all screws are tight

Mount it
- 1/4-28 threads
