DP-T5 Attaching the Tobii I-13 or I-16 to a Mount'n Mover with a Tilt Plate

Tobii I-13

① DP-T5

The other two screws are holding the parts together. Take apart before step #2

QCR →

← DP-1x2

x4 (8-32 x 2")
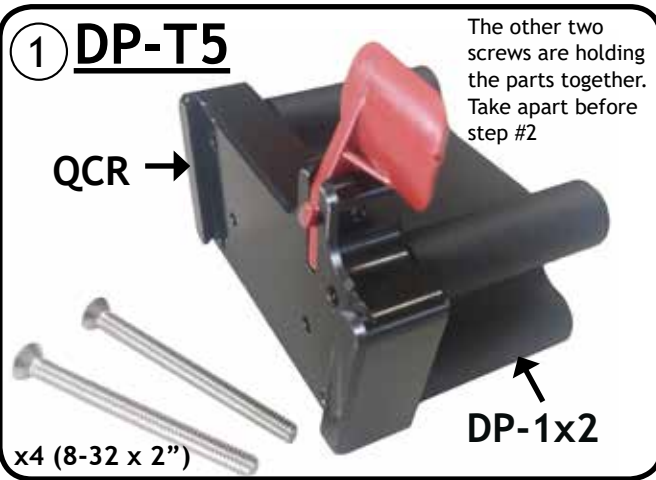

The DP-T5 consists of the Quick Connect Receiver (QCR), the DP-1x2, and four 8-32 x 2" screws.

② Assemble QRP to DP-T5
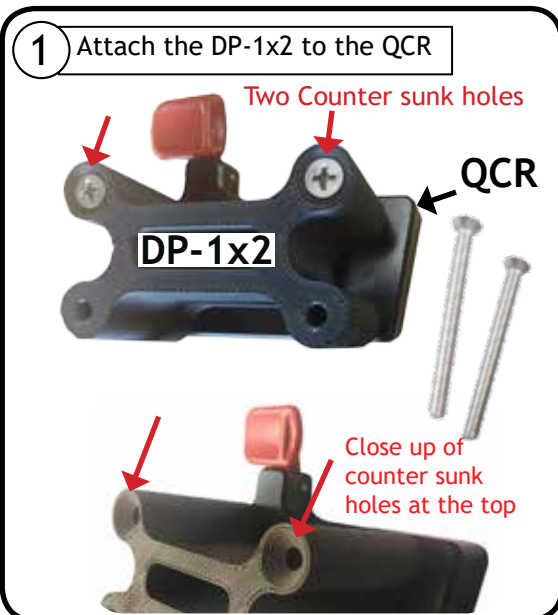

QRP

DP-1x2

← QCR
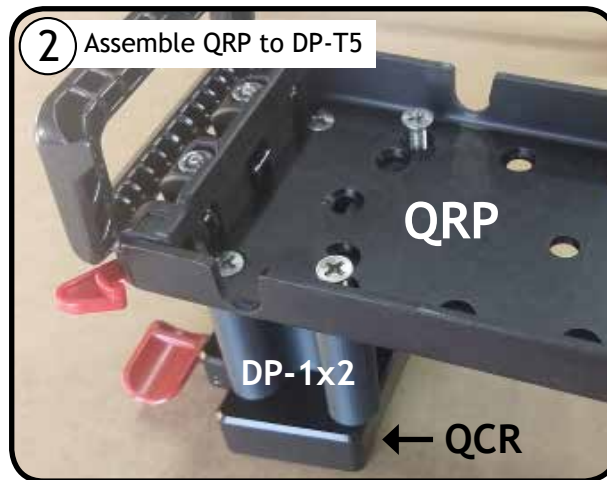

Use the four screws that come with the DP-T5 to go through the Quick Release Plate (QRP), through the DP-1x2 and into the Quick Connect Receiver (QCR)
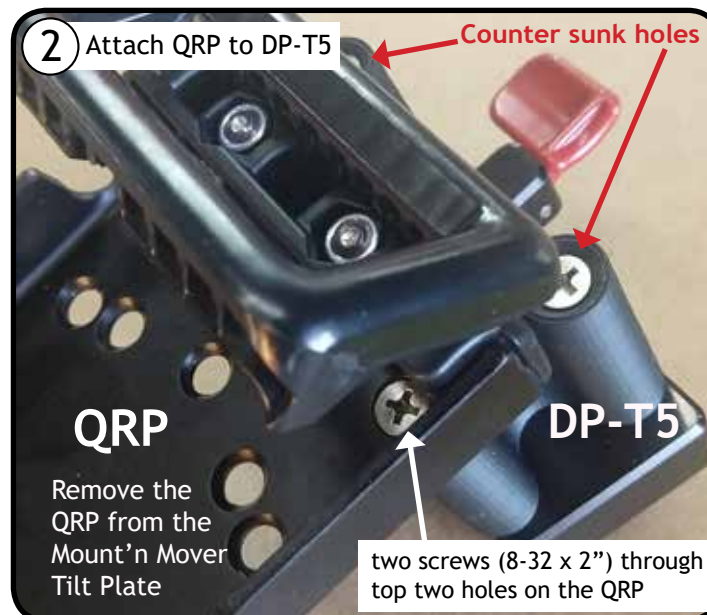

③ Attach QCR to Tobii Device

Tobii Device Plate

Slide Up

Slide the DP-T5 onto the connecting grooves on the Tobii device plate until it "clicks" in place.

Tobii I-16 ✱ Reconfigure screws for an I-16

① Attach the DP-1x2 to the QCR

Two Counter sunk holes

QCR

DP-1x2

Close up of counter sunk holes at the top

Attach the DP-1x2 to the QCR with TWO of the 2" screws (use the two counter sunk holes)

② Attach QRP to DP-T5

Counter sunk holes

QRP

DP-T5

Remove the QRP from the Mount'n Mover Tilt Plate

two screws (8-32 x 2") through top two holes on the QRP

Quick Release Plate is attached using the other TWO 2" screws. Go through the QRP, the DP-1x2, and into the lower two holes on the QCR.
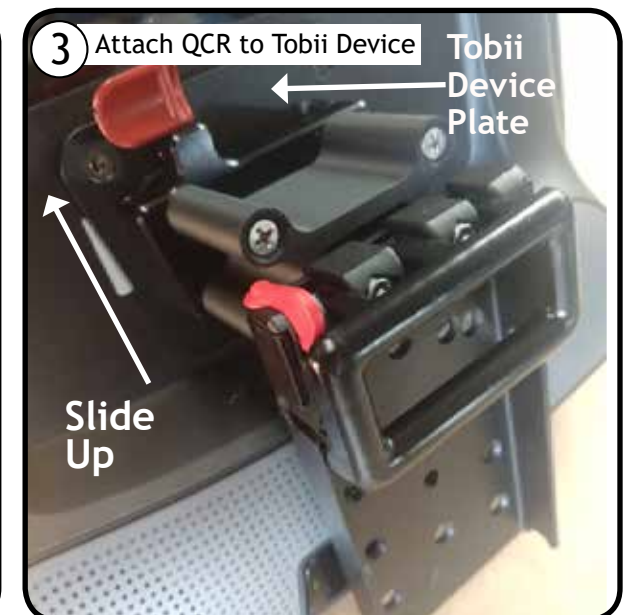

③ Attach QCR to Tobii Device

Tobii Device Plate

Slide Up

Slide the DP-T5 onto the connecting grooves on the Tobii device plate until it "clicks" in place.

# DP-T5 Attaching the Quick Release Plate (QRP) to the Tilt Plate

1 Attach QRP to Tilt Plate

Tilt Plate

QRP

Notches

First connect the notches on bottom of the QRP to the protruding pins at the bottom of the Tilt Plate.

2 Lock down Tilt Handle

Tilt Handle

Lock Down

Lock down the black Tilt Handle.

3 Lock Red Lever

LOCK

Swing RED LOCK LEVER into lock position. This locks down the Tilt Handle.

4 Tobii locked in place

Tobii I-13 fully attached and locked in place

Remove Tobii I-13 or I-16 from Mount'n Mover

Push RED TAB and lift device up

You can also remove the device at the Quick Release Plate (QRP)

Tobii I-13 detached from Mount'n Mover

Set up for IR Remote Control Access for the I-13 and I-16 (DP-T5 + DP-EXT)

IR Remote Control Access Window

* (Offset to the right or left of the IR window)

QRP

### 1 List of Parts

Red Flag

DP-1x2

QCR

x4
(8-32 x 2")
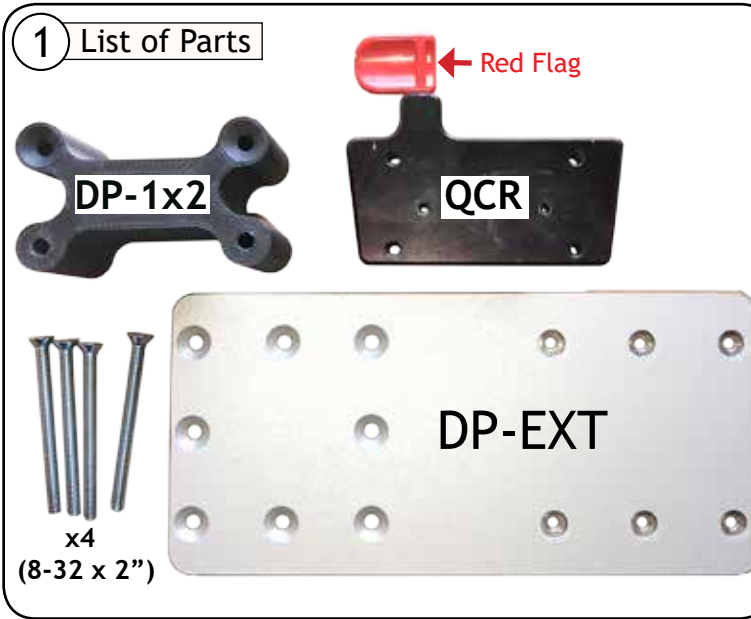

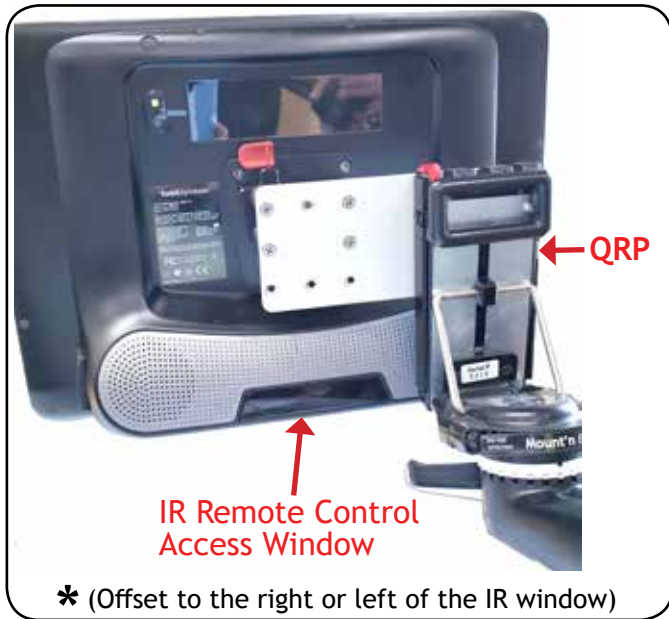

DP-EXT

Parts needed are the DP-T5, the DP-EXT (Extension Plate),and the Quick Release Plate QRP (included with the Mount'n Mover)

2 Place DP-1x2 over QCR

Two Counter sunk holes

Place the DP-1x2 over the Quick Connect Receiver. Note the counter sunk holes are at the top and the red flag is on the left

3 Attach DP-EXT to DP-1x2 and QCR

(8-32 x 2")
x4 screws

DP-EXT

DP-1x2

Counter sunk holes

Place DP-EXT over the DP-1x2 and use the four screws to attach all three parts together. Note the countersunk holes on the DP-EXT are facing up.

4 Attach QRP to DP-EXT

DP-EXT

DEVICE ATTACHMENT HARDWARE: QRP to Device Plate

(8-32 x 1/4")
x4 screws

QRP

assembled extension
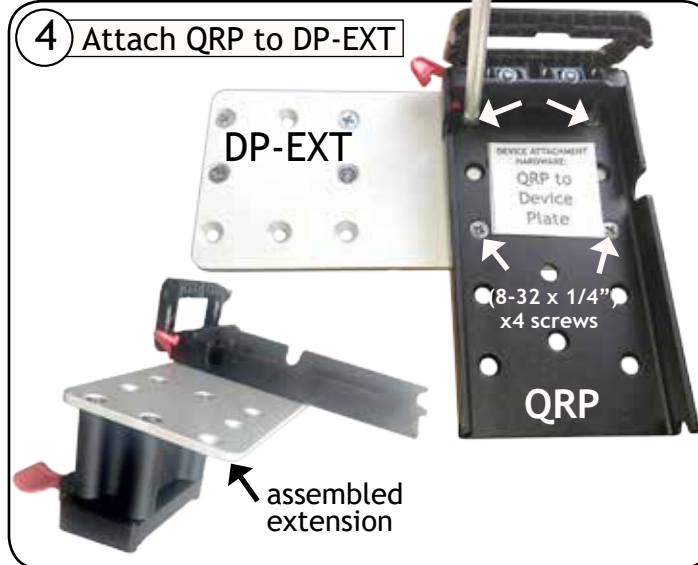

Place the Quick Release Plate (QRP) over the DP-EXT and attach to the threaded inserts in the EXT with four (8-32 x 1/4") screws (labeled QRP to Device Plate)

5 Mount to the Tobii Device

Slide Up
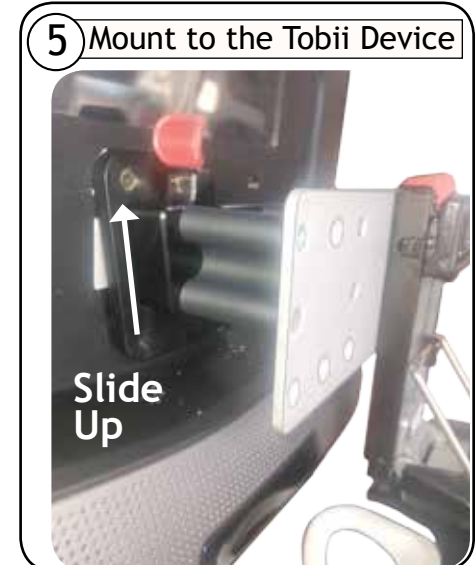

Slide the Extension up onto the connecting grooves on the Tobii plate until it "clicks" in place

Set up for I-13 and I-16 with a Universal Rotator (DP-UR)
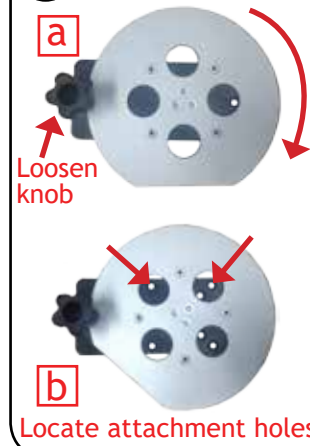

A | Set up for IR access

Rotator used with Extension plate for access to Infrared window.
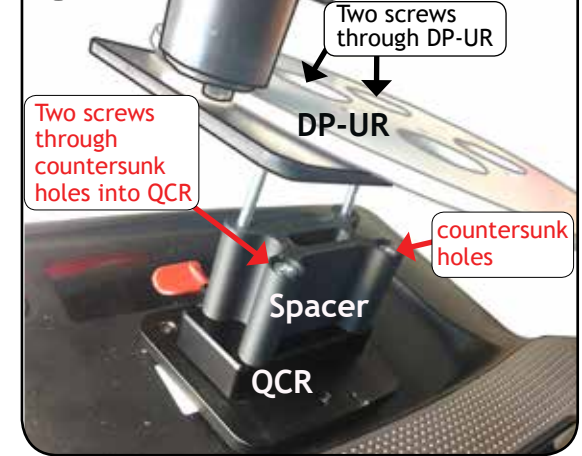

1 | Parts needed

DP-T5   DP-UR

DP-EXT

The DP-T5 includes:
1. Spacer
2. QCR
and four 8-32 x 2" screws

2 | Turn Rotator

a
Loosen knob

b
Locate attachment holes

Loosen the knob and spin the Rotator to reveal the attachment holes.

3 | Attach DP-UR to DP-T5

Two screws through DP-UR

DP-UR

Two screws through countersunk holes into QCR

countersunk holes

Spacer

QCR

Use two of the 8-32 x 2" screws through two of the holes in the DP-UR, through the DP-T5 spacer, and into the threaded holes in the QCR. The other 2" screws attach the spacer to the QCR.

4 | Attach DP-EXT to DP-UR

DEVICE ATTACHMENT HARDWARE:
Attaching QRP to Rotator

Knob can be on left or right sides
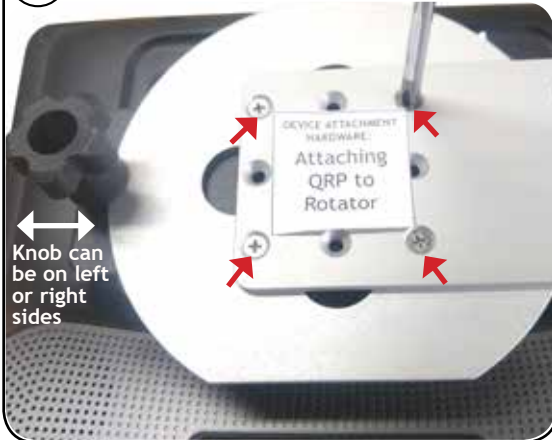

Attach the Extension Plate (DP-EXT) to the Rotator (DP-UR) with four screws labeled "Attaching QRP to Rotator" (8-32 x 3/16"). Note the Rotator knob can be on left or right side.

5 | Attach QRP to DP-EXT

DP-EXT

DEVICE ATTACHMENT HARDWARE:
QRP to Device Plate

QRP
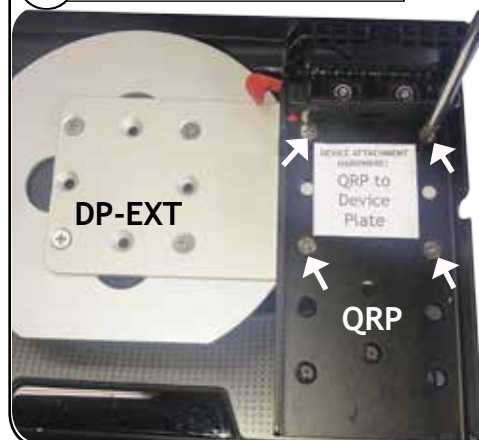

Attach the QRP to the threaded inserts on the DP-EXT with four screws (8-32 x 1/4") labeled "QRP to Device Plate".

B | No IR access

1 | Parts needed

DP-T5   DP-UR

(See above steps #2 + #3)

2 | Turn Rotator

3 | Attach DP-UR to DP-T5

4 | Attach DP-UR to QRP

Attaching QRP to Rotator

Attach the QRP to the threaded inserts on the DP-UR with four screws (8-32 x 3/16") labeled "QRP to Rotator".
